

TOUCHLOCK K series keypads

- ▼ Use with Switch2 or Net2
- ▼ Supplied with a choice of black or white bezels
- ▼ 3 sizes
- ▼ Low profile - less than 16mm deep
- ▼ Easy mounting
- ▼ IP67 rated - suitable for external use

About - K series keypads are for use with Switch2 and Net2 systems. The keypads are supplied with a choice of black or white bezels. Additional colours are available as shown in the illustration below. Replacement bezels are available to Paxton registered installers free of charge. K series keypads are available in three sizes.

Installation - The keypad is wired as shown on the control unit label. The cable exits centrally from the back of the keypad making drilling and mounting very accurate.
